An h1 header	1
An h2 header	3
An h3 header	3

An h1 header

Paragraphs are separated by a blank line.

2nd paragraph. *Italic*, **bold**, `monospace`. Itemized lists look like:

- this one
- that one
- the other on

Note that — not considering the asterisk — the actual text content starts at 4-columns in.

Block quotes are written like so.

They can span multiple paragraphs, if you like.

Use 3 dashes for an em-dash. Use 2 dashes for ranges (ex. “it’s all in chapters 12–14”). Three dots . . . will be converted to an ellipsis.

An h2 header

Here's a numbered list:

1. first item
2. second item
3. third item

Note again how the actual text starts at 4 columns in (4 characters from the left side). Here's a code sample:

```
# Let me re-iterate ...  
for i in 1 .. 10 { do-something(i) }
```

As you probably guessed, indented 4 spaces. By the way, instead of indenting the block, you can use delimited blocks, if you like:

```
define foobar() {  
    print "Welcome to flavor country!";  
}
```

(which makes copying & pasting easier). You can optionally mark the delimited block for Pandoc to syntax highlight it:

```
[]  
[numbers=left,,firstnumber=100,]
```

An h3 header

Now a nested list:

1. First, get these ingredients:
 - carrots
 - celery
 - lentils
2. Boil some water.
3. Dump everything in the pot and follow this algorithm:

```
find wooden spoon
uncover pot
stir
cover pot
balance wooden spoon precariously on pot handle
wait 10 minutes
goto first step (or shut off burner when done)
```

Do not bump wooden spoon or it will fall.

Notice again how text always lines up on 4-space indents (including that last line which continues item 3 above). Here's a link to [a website](#). Here's a link to a [local doc](#). Here's a footnote ¹.

Tables can look like this:

[c]@lll@ size & material & color
9 & leather & brown
10 & hemp canvas & natural
11 & glass & transparent

(The above is the caption for the table.) Here's a definition list:

apples Good for making applesauce.

oranges Citrus!

tomatoes There's no "e" in tomatoe.

Again, text is indented 4 spaces. (Alternately, put blank lines in between each of the above definition list lines to spread things out more.)

Inline math equations go in like so: $\omega = d\phi/dt$. Display math should get its own line and be put in in double-dollarsigns:

$$I = \int \rho R^2 dV$$

Done.
